

# Key Activity Trainer Key Features and Benefits:

- **Affordable** . . . Priced as a cost effective solution for a wide range of students.
- **Almost 2 decades of research** showing Video Modeling to increase acquisition rates for wide variety of skills for individuals with **autism** and other **learning disabilities**.
- **First Software** to make video modeling **practical** and easy for at school and home. No more fumbling around with video tapes, CDs, or DVDs trying to find a section of the video to play or replay.
- **Activity Skills Library** provides hundreds of videos with still images, audio, text, and worksheet resources to teach hand-on skills including Academic, Daily Living, Communication, Social, Recreation, and Vocational Skills. You will get many more activities that we create for the Skills Library as part of the free updates in the first year after purchase.
- **Data Collection** includes automatic date/time stamp and run count of videos, provides for addition of notes, and allows for easy recording of results for prompt level required for student success on each run (Independent, Shadow, Gesture, Verbal, Physical) with choice of intensity levels 1-5.
- **Unlimited Students** with individualized videos and resources with prompt levels targeting specific student needs. The AT remembers where each student is on each activity to make it easy for us to work on many skills across a classroom of students.
- **Expert Task Analysis** is built in to the activities so that teachers, teaching assistants or parents can implement powerful teaching methods with a few clicks of the mouse.
- **Activity Schedules** can be created to help student use newly learned activities and skills in a structured visual schedule format. Schedule is configurable to meet student needs. Classroom view allows for students to take turns completing their specific schedules.
- **Add Your Own Videos** to the Activity Trainer under the User Library under the Activity Library Tab. This feature allows the user to customize targeted activities for specific settings, procedures, and materials.
- **Help Videos** are available from the Main Menu or by clicking on the Red “?” on each page
