Research Based

- Based on decades of behavioral methodology research to teach individuals with autism and other learning disabilities

Verifiable Results

- Collects data & provides reports to verify & track progress

Robust Content Library

- Hundreds of content programs ranging from matching and identification to time, money, and math word problems

Target Students

- Designed for individuals with autism
- Configurable for a wide range of individuals
- For students developmentally 2 to 9 years old
- Typically used with self-contained and resource classes, ABA-DT & VB programs, at risk students

Features

- Designed for independent use: Most students can become independent learners with a touch screen or mouse
- Automates repetitive teaching tasks
- Great Reinforcers: Hundreds of selectable reinforcers to motivate your student, and you can add your own!

Affordable

- Priced for use with a wide variety of students
- \$149 Home or Single Student
- \$349 Single Computer, Unlimited Students
- Includes 1 year of updates and support

Discrete Trial Trainer™ Product Information

DT Trainer Overview: You will find the DT Trainer to be a robust virtual tutor for your child or students. This is a large, effective product for a very reasonable price. The DT Trainer is based on heavily researched methods developed to teach our most difficult to educate individuals: children with autism. Additionally, the DT Trainer's configurability also makes it beneficial for children with other learning disabilities and even for typically developing young children. Behavioral methods have been proven effective for teaching individuals including those with autism. The software motivates individuals to perform tasks which they may not want to learn or may find difficult to learn. There are hundreds of colorful, interesting, and fun reinforcers to pick from which engage even difficult to motivate individuals. You can even add your own reinforcers! The DT Trainer breaks down learning into the appropriate steps for low functioning to high functioning students.

Free 30 Day Trials: Free 30 day trials are available from our web site. The download is fairly large, so if you have problems downloading the trial you can request a trial CD. The CD can install any number of computers so you can pass it around to other teachers or parents.

Designed for Independent Use: Even individuals that require one-on-one teaching can usually become independent learners.

The DT Trainer:

- eliminates or reduces the cost or time of a one-on-one teacher, therapist, or parent while the child is using the software
- frees parents and teachers to attend to other responsibilities while the child is engaged in a productive educational activity
- allows even very low functioning or young students to usually become independent learners using a touch screen
- is like having a teaching assistant that works one-on-one with the student

Individualized Instruction: The DT Trainer is highly adjustable to accommodate the needs of the individual learner and the preferences of the teacher or parent. The configurability within the DT Trainer allows the user to adapt the software to accommodate the specific learning needs of individuals ranging from low functioning or early learners to typically developing young learners.

Broad Scope of Content Programs: The DT Trainer is currently installed with hundreds of content programs.

- Skill Areas: Matching, Identification, Counting, Phonics, Classification, Sequencing, Spatial Relations, Math, Time, Money, Word Analysis, Wh Questions, Word Recognition
- Example Programs: objects, colors, numbers, shapes, body parts, counting, addition, money, time recognition, months, survival words, synonyms, and math word problems

Supports a Variety of Input Devices: The DT Trainer supports a mouse, touch screen, double switch, or single switch.

Data Collection: The DT Trainer collects data on each trial. Reports can be used to evaluate the learner's progress, and to modify their programs.

Great Reinforcers: The DT Trainer is installed with hundreds of multimedia reinforcers to motivate the student. Reinforcers include basic cause and effect, games and interactive activities, stimulating visuals, music, animations, and movie clips. The program also allows you to add your own reinforcers such as movies, games, or even web pages. For example, it is easy to add a movie of a child doing a favorite activity, which can be very powerful for a young or low functioning individual. The reinforcement rate is adjustable to provide the appropriate level of reinforcement, and the reinforcers can be changed periodically to keep the program interesting. Many of the cause and effect reinforcers can be used to build basic mouse or touch screen skills, and there is even a reinforce-only mode for very young children or very low functioning individuals to help build basic interactions with the computer. The current list of reinforcers is impressive, and AES is expanding the set to continue providing the most powerful reinforcement system available!

Additional Benefits for Low Functioning Students: Other possible benefits are that the DT Trainer:

- helps to generalize or maintain information
- converts unproductive / self-stim time into productively spent time
- improves self esteem - child realizes that he can learn on his own
- increases ability to stay on task

Complements Variety of Classrooms & Settings: The DT Trainer complements a variety of school & home educational programs:

- Autism classes (ABA - DT & VB, TEACCH, eclectic, and other)
- Self contained Intellectual Disabilities classes
- Home based ABA - DT & VB and eclectic programs
- At Risk 4 year old preschool, Head Start, Preschool Disabilities
- Regular education kindergarten and preschool classes
- Home schooling

Affordably Priced: The DT Trainer is priced affordably so that it is a cost effective solution for a wide range of students, and not just the most expensive to educate. This is a large and robust package with one year of updates at a very modest price point. Our pricing is intended to help make the DT Trainer a standard package in appropriate classrooms and home settings.

Training: The DT Trainer comes with training videos, and web based training sessions are also available.
