

Registering Your Discrete Trial Trainer (2.0.5 or later)

The DT Trainer now has a much simpler internet based registration procedure. The simplest method is for directly connected systems via network or dial up phone line. The directly connected system is the computer where the DT Trainer is installed. If a direct connection is not available but you have access to another computer that is connected, then there is registration option where you will use a removable media like a floppy to complete the registration. Finally there is a phone option for customers that do not have any access to the internet.

To register, follow the steps below. You will need **DT Trainer 2.0.5** or later to support this feature. If you do not yet have this version, download the update from www.dttrainer.com/updates.html.

The screenshot shows the 'DT Trainer - Version 2.0.5 - Administration' dialog box with the 'Registration' tab selected. The 'Registration Information' section displays 'Authorization Code: AES-1000-66-1234', 'Use Type: Home', 'License Type: Unregistered', and 'Expires Soon: 01/15/04'. The 'DT Trainer Location' section has radio buttons for 'School District' (selected), 'Institution', and 'Home'. Fields include 'Room Name or #' (214), 'Class Name' (TMD), 'School' (West Elementary), and 'School District' (Townsville School District). A 'Misc. Info. or Comments' text area contains 'The DT Trainer is a great tool!'. The 'Support Contact' section has fields for 'First Name' (Jane), 'Last Name' (Doe), 'Title' (Teacher), 'Phone' (Work/Home), 'AC & #' (803-555-5555), 'Ext.' (1000), 'Email' (Work/Home), and 'Address' (City: Townsville, State: SC, Zip Or PC: 29169, Country: USA).

1. Obtain your Authorization Code. This may be on the front cover of your User's Guide. If you have purchased, and do not have your code, contact AES.
 2. Select the Registration tab on the DT Trainer administration dialog.
 3. Select your **DT Trainer Location** (School District, Institution, Home).
 4. Complete the Location information.
 5. Complete the Support Contact Information. This person should be the teacher, Parent, or other individual actively managing the DT Trainer for the students.
- Note:** All fields with an "*" are required.
6. Click **Register**.

The screenshot shows the 'Registration' dialog box. It contains the text: 'To register, you need your Authorization Code. This may be on the front cover of your User's Manual. If you do not have this information, please contact AES.' Below this are fields for 'Authorization Code' (AES-1000-66-1234) and 'Customer ID' (1000). A 'Machine Key' field contains 'PRRJ-DE42-1LZI-50LI-GA5Z-PRFM' with the note '(Unique to this system)'. A note states: 'Select from one of the following registration methods. NOTE: Each system has a unique registration and therefore the activation key from one system will not work for another system.' There are three tabs: 'Connected' (selected), 'Not Connected', and 'Phone'. A text area explains: 'This system is internet connected. This is the fastest option if your system is currently connected to the internet via a dial up or network connection. Enter the information above then click the "Process Registration" button.' A 'Process Registration' button is centered at the bottom. At the very bottom are 'Done' and 'Come Back Later' buttons.

7. Enter your **Authorization Code**.
8. If you have internet access by a network or dial up phone connection, then use the Connected tab registration option. Click **Process Registration**.*

Registering Your Discrete Trial Trainer (2.0.5 or later)

DT Trainer - Version 2.0.5 - Administration

Registration

To register, you need your Authorization Code. This may be on the front cover of your User's Manual. If you do not have this information, please contact AES.

Authorization Code: Customer ID:

Machine Key: (Unique to this system)

Select from one of the following registration methods. NOTE: Each system has a unique registration and therefore the activation key from one system will not work for another system.

Connected | Not Connected | Phone

This system is internet connected. This is currently connected to the internet via a dial up or network connection. Enter the information in the "New Activation Key Accepted." dialog box to complete the "Registration" button.

Key OK

New Activation Key Accepted.

OK

Process Registration

Done Exit Come Back Later

9. When you see **New Activation Key Accepted** dialog, your DT Trainer is registered and ready to use!

Connected | Not Connected | Phone

This system is NOT internet connected but you have access to a system that is connected. This method will create a request file and copy that file and an executable file to a floppy or other removable media. Take the media to a web connected system and execute the AESProcessRequest.exe file. AESProcessRequest will get the activation key for this system and save it to the file. Then bring the media back to this system to processing from the file.

Step 1:

Step 2: Take the floppy or other media to a internet connected system.

Step 3: Execute the AESProcessRequest file on the media from the internet connected system.

Step 4: Return the removable media to this system.

Step 5:

Done Come Back Later

Connected | Not Connected | Phone

If you do not have access to an internet connected system, or you are having problems with the other registration methods, then call us to register by phone: 803-233-0541.

Activation Key:

Done Come Back Later

10. If your computer is not connected to the internet, select one of the other tabs and follow the onscreen instructions.

Note: These registration procedures replace those described in the 2.0.0 version of the DT Trainer User's Guide on pages 3-3 to 3-5.
